End - End Communication at Transport layer

Aim :-

a. To implement echo client server using TCP/UDP sockets

b To implement chat client server using TCP/UDP sockets.

Algorithm :-

⇒ Part A - Echo client server

1. Implement echo client server using sockets.
2. Use TCP/UDP sockets for communication b/w client & server.
3. client server communication performed at transport layer.
4. Data exchanged b/w client & server
5. Record input & output

⇒ Part B - chat client server

1. Implement chat client server using socket programming
2. Use TCP/UDP sockets for communication - Establish communication b/w client and server.
3. Exchange messages b/w client & server
4. observe messages received at both end

Input :-

Part A :-

Message/data given by client for echo communication.

Part B :-

Messages entered by client & server during chat communication.

Shruti

Result :-

Echo client server & chat client server communication using TCP / UDP sockets implemented successfully.
